

Cloud-Based Dispatch & Logistics Solutions

PDI/CloudFuel

Redefining efficiency of real-time petroleum logistics

PDI/CloudFuel will electronically dispatch trucks, capture deliveries in the field, and return that completed information to Ascend for invoicing all done automatically in real-time utilizing bluetooth technology.

PDI/CloudFuel can even control LCR II meters wirelessly via bluetooth with any Android device. The system is easy to use and lay's over top of your current operation. Any tablet or Smart phone will work.

Streamlined Efficiency

Real-time Data

Wireless Management

“As a logistics professional and hands-on dispatcher, I need a system that’s easy to use and provides total fleet visibility. CloudFuel has developed a solution written by dispatchers for dispatchers. “

- PDI CloudFuel Customer, California
