

Bangkok Aviation Fuel Service (BAFS)

A PDI Case Study

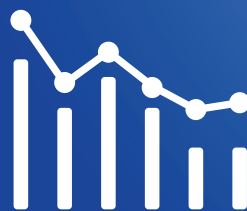

Overview

HQ: Bangkok, Thailand since 1983
Industry: Aviation Refueling
Size: 70+ Trucks
PDI Solution(s): PDI AvPac, AvFleetMarshall, AvManager, AvSchedule

Business Challenge

- Needed a significant modernization of equipment to manage the volume of fuel in the hydrant pipeline network
- Wanted a solution to provide clear scheduling for fueling vehicles, interface with a flight information delivery system (FIDS), and handle fuel supply, contract creation and allocation of flights to fuel suppliers

**Quantifiable
decrease**
in maintenance costs for BAFS

BAFS increased fleet visibility across multiple airports.

Customer Results

Increased system stability

Reduced maintenance and support costs

Enhanced fleet reliability

Improved company bottom line

BAFS experienced clear improvements to the visibility and efficiency of their 24-hour fueling fleet.
