

Oel-Pool

A PDI Case Study

Overview

HQ: Suhr, Switzerland since 1975
Industry: Heating Oil Distribution
Size: 80+ Trucks
PDI Solution(s): PDI TransPac, FleetWatch

Business Challenge

- Business growth led to an increase in the amount of manual paperwork
- Employees spent more time sorting paper documents and less time increasing deliveries and improving customer service
- Lacked reliable truck history and trip activity data

Increased efficiency resulted in
more deliveries

Supported meter connections and uncovered essential information for drivers to combat paperwork.

Customer Results

Improved delivery efficiency by implementing on-board billing and printing

Reduced errors from outdated, manual fleet management system

Increased database of historical information on truck activities

Eliminated expensive, inefficient paperwork through the use of mobility

Oel-Pool saw improvements in resource utilization that helped yield a better bottom line.
