

Real-Time, Paperless Load Closure

PDI Logistics Cloud

Realize immediate gains in efficiency by empowering drivers and dispatchers with access to real-time inventory.

PDI Logistics Cloud simplifies workforce automation and delivers operational efficiency for retailers, wholesalers, and carriers making bulk and metered deliveries to retail, commercial, and residential sites. Boost operational efficiencies with a mobility app that enables paperless transactions and automated accounting, paperless POD, and total records management.

Enhance Inventory Management

Simplify Billing

Increase Driver Utilization

Improve Customer Service

“The biggest thing I’m seeing right now is data coming in, into the hands of the right people on their phones and tablets at the right time.”

—James Cameron Lee, 4Refuel

Key Benefits at a Glance

- Optimize inventory with fewer run-outs, diversions, and split loads
- Increase average load sizes and lower transportation costs
- Reduce cycle time for billing and payroll
- More efficient dispatching and increased dispatcher productivity
- Paperless transactions and automated accounting
- Cost-to-serve planning, reporting and management

Gain a competitive advantage

- Increase productivity with a completely mobile solution with minimal data entry.
- Streamline deliveries with lift and delivery information and changes recorded in real-time.
- Gain visibility with vehicle tracking and up-to-the-minute delivery status updates.
- Lower dispatch costs and increase efficiency with real-time communication between drivers and dispatchers.
- Reduce paperwork and errors, and speed up billing with real-time, paperless load closure.
