Overview

PDI Logistics Cloud brings end-to-end visibility to the fuel supply chain.

As digital transformation changes the way businesses operate, we’re here to give fuel retailers, oil and gas companies, wholesalers, and haulers the tools and insights to succeed. With the PDI Logistics Cloud platform, your business can grow and have more agility to adapt to the industry’s changing needs and dynamics. We provide you with smart applications and mobile tools to gain visibility, insight, and control, and we’re looking at new ways to innovate the way this industry manages and moves fuel all around the world. Digital transformation isn’t a destination – it’s a journey – and PDI will be there with you every step of the way.
Predictability can improve reliability and make a dispatcher’s job easier. And, when it comes to planning, better tools to manage data will help you run more efficiently. Get everything you need to leverage your data to increase efficiency and improve your forecasts and planning accuracy. Experience superior inventory management for VMI customers while reducing complexity and increasing transparency. Automation, visibility, real-time data, and dynamic adjustments eliminate redundant tasks and help you optimize planning to prevent returns and runouts, balance your inventory, ensure compliance, and reduce idle capital.

Enhance Planning with these options:
• ATG Readings
• Forecasting
• Inventory Management
Focus on what matters with an intuitive and modern web application that lets you easily adjust schedules, minimize surprises, and maximize payload usage. Get the best payload usage and meet domestic and cross-border regulations using a solution that enables you to optimize loads at the truck and compartment level, automatically allocate loads to compartments, and easily manage your weights. Real-time status updates, data visualization, plausibility checks, and what-if scenarios help your dispatchers craft the best schedules and routes. With improved efficiency, visibility, and decision making, your team can achieve maximum productivity while keeping your customers happy.

Enhance Dispatch with these options:
- Routing
- Reconciliation
In-Truck

- Mobile App
- Real-Time Communication

Easy access to data anywhere and at any time can make a typical day on the road more productive. The driver-friendly mobile app provides access to complete shift, trip, loading, and delivery data in one place. It automates workflows, enables paperless distribution, and provides seamless, real-time communication. The app fully integrates with our dispatch solution to help you optimize operations and manage the unexpected. Real-time visibility lets you react quickly, improve your customer’s experience, and enjoy faster reconciliation and billing.

Enhance In-Truck with these options:
- E-Dip Requests
- Track & Trace
- Telematics
- Paperless Delivery
- Remote Access
- Navigation
Carriers

Connect with your vendors and carriers to seamlessly manage your operations and gain end-to-end visibility. Get full visibility into delivery, location, billing and other vital information and support for centralized, and de-centralized dispatching. The platform provides the flexibility you need to manage your operations as your business grows and transforms. Well-designed data synchronization ensures your various stakeholders see only the information they are supposed to see, while you keep full visibility and control over your entire operations.

Enhance Carriers with these options:
- Vender/Carrier Management
- Data Sync
Compliance

- User Rights Management
- Dangerous Goods
- Weights Management
- Data Logging

Wherever you are in the world, PDI Logistics Cloud can help you meet your regional regulatory requirements while keeping your drivers safe. Easily adjust and configure the solution to meet the unique regulations governing transportation via truck and transportation of dangerous goods (HAZMAT) in your delivery area. We’ve enhanced security by giving you the ability to limit access and permissions based on user roles. The platform’s advanced logging capabilities help your team respond quickly and confidently to incidents and audits.
Be proactive, prevent costly mistakes, and make better, data-driven decisions to uncover growth opportunities. Get the tools you need to track and analyze business performance and operational health. Advanced reporting and alerts make it easier to identify trends, detect unexpected behavior, and manage by exception. Get the insights you need to meet regulatory and auditory requirements confidently.

Enhance Insights with these options:
- Custom Reports
- Document Management
- BI Extracts
PDI Logistics Cloud provides API integration with a vast third-party ecosystem to bring you closer to a fully digitized supply chain. Seamless integration to third-party systems increases supply chain visibility and allows accurate and timely data exchange.

**Enhance Integration with these options:**
- ERP
- Terminal Automation System (TAS)
- Hardware
- Wetstock Management
- Ordering Portals
- Automatic Tank Gauging (ATG)
About PDI

Professional Datasolutions, Inc. (PDI) helps convenience retailers and petroleum wholesalers thrive through digital transformation and enterprise software that enables them to grow topline revenue, optimize operations and unify their business across the entire value chain. Over 1,500 customers in more than 200,000 locations worldwide count on our leading ERP, logistics, fuel pricing and marketing cloud solutions to provide insights that increase volume, margin and customer loyalty. PDI owns and operates the Fuel Rewards® loyalty program that is consistently ranked as a top-performing fuel savings program year after year. For more than 35 years, our comprehensive suite of solutions and unmatched expertise have helped customers of any size reimagine their enterprise and deliver exceptional customer experiences.
