

DO YOU HAVE A CERTIFIED MNOSP?

Don't forget about the Outdoor EMV deadline in April

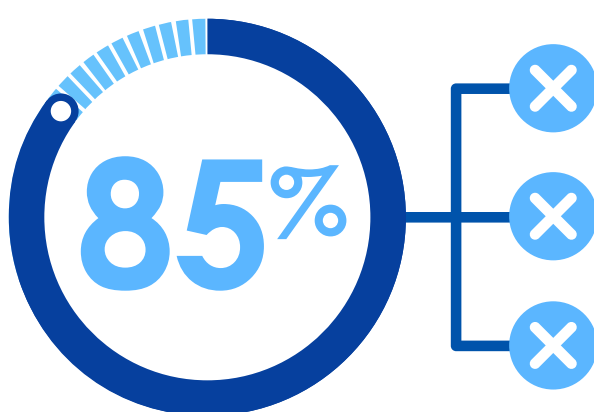

Is April 17, 2021 highlighted on your calendar?

The Outdoor EMV liability shift deadline is now less than six months away and you must have a certified Managed Network Service Provider (MNOSP) to complete your deployment.

What's Holding You Back?

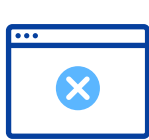

According to the 2020 Conexus EMV Preparedness Report, 85% of surveyed sites have not completed a full Outdoor EMV deployment.

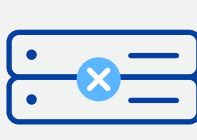

Top deployment challenges

1. Not sure how to pay for it

2. Lack of available software

3. Lack of available hardware

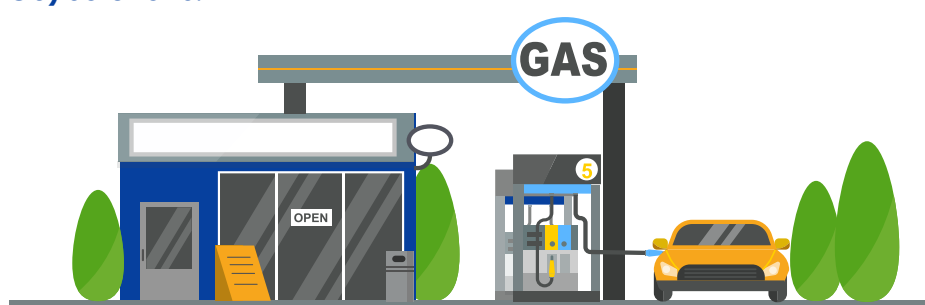

4. Currently have other priorities

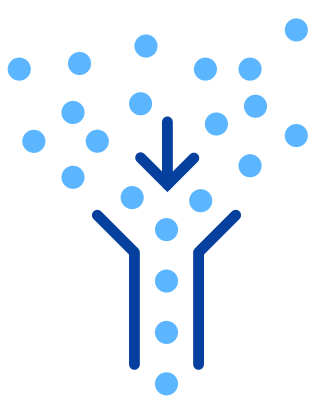

Did You Know...

Gilbarco and Verifone require a certified MNOSP to support critical functions for their point-of-sale (POS) solutions.

This is mandatory for completing your Outdoor EMV initiatives.

Avoid the Bottleneck

The longer you wait to order your MNOSP upgrade and schedule your vendors, the more you put your business at risk.

- Lead times for services are getting longer!
- Skilled technicians are in short supply!
- All non-compliant sites are competing for the same limited resources!

Take These 4 Steps Now

To simplify your MNOSP upgrade, choose an experienced partner that has already performed thousands of deployments.

STEP

Check with your brand (if applicable) and order the recommended MNOSP solution ASAP.

STEP

Start preparing your team, vendors, networks, and IT systems to avoid delays and complications.

STEP

Install your MNOSP solution and test it thoroughly.

STEP

Complete any remaining elements of your Outdoor EMV initiatives.

Schedule Your Upgrade Today

You can't afford to wait!

As a certified MNOSP for Verifone and Gilbarco POS systems, Cybera has helped thousands of sites like yours complete their Outdoor EMV initiatives.
